

California Tribal Gasoline Permits

General Air Quality Permit for New or Modified Minor Source Gasoline Dispensing Facilities in Indian Country within California

EPA is proposing a draft general permit under the Clean Air Act Federal Indian Country Minor New Source Review (NSR) program for gasoline dispensing facilities (GDFs), such as gas stations, located in Indian country within the geographical boundaries of California.

This action proposes to establish a uniform set of requirements, based on local air quality conditions, and streamline the EPA's permitting of gas stations, and other GDFs, that construct or modify in Indian country within California.

These requirements are intended to complement the requirements for gas stations already in place on non-tribal lands in California.

The EPA will accept public comments until November 30, 2016 and has also scheduled a public hearing for receiving comments on November 30, 2016 at 2:00 p.m. at the EPA Region 9 Office in San Francisco, California. You may submit your comments electronically to Lisa Beckham at R9AirPermits@epa.gov or through the online docket: [EPA-R09-OAR-2016-0580](https://www.epa.gov/epa-dockets/electricity-delivery-energy-infrastructure-docket).

Additional information on submitting comments and the public hearing is provided in the Public Notice linked below. For further information, please contact Lisa Beckham at (415) 972-3811 or R9AirPermits@epa.gov.

Information supporting the EPA's proposal is available through the online docket.
