

April 11, 1927.

Mrs. Walter Leroux,
Geyserville,
Sonoma County,
California.

My dear Mrs. Leroux:

Your valued communication of recent date, making reference to Mr. Beech whom you recommended as a reliable man to sink a well on the recently acquired rancharia near the Lytton School, is received and carefully noted. The matter will be given due consideration.

It is noted with considerable pleasure and satisfaction that the people residing near the Lytton School are changing their views as regards the Indians and that some who were most persistent in their protest are now expressing a different view and that we may expect co-operation from them.

It is my intention to visit your locality at the earliest practical date; however, it will probably be after the 20th of the present month.

With best wishes, I am

Very sincerely,

L. A. Dorrington,
Superintendent.

LAD-E
